

1. Remove display from case and play on a clean surface on the ground. Open the display by gently pulling at the corners until fully opened, and secure the frame in place by pushing down on the locks and hooking it in place.

2. Once all the hooks have been locked and the display is secure, zip the graphics in place at the edge of the display with the assistance of another person pressing down on the frame to ensure the graphic is properly zipped.

3. Once all graphics have been set up, install lights by clamping it to the top of the frame corners and turning the knob to tighten it. Be cautious as the halogen spotlights can be very hot.

4. Once lights are set up, if necessary install the lightblocker by attaching along the edge of the frame with the Velcro provided.
