

Setup Manual

For Fabric Pop-Ups

Step 1.

Remove the pop-up frame from its casing and nylon bag, and set on the floor in an area with enough empty space to accommodate for the full size of the frame.

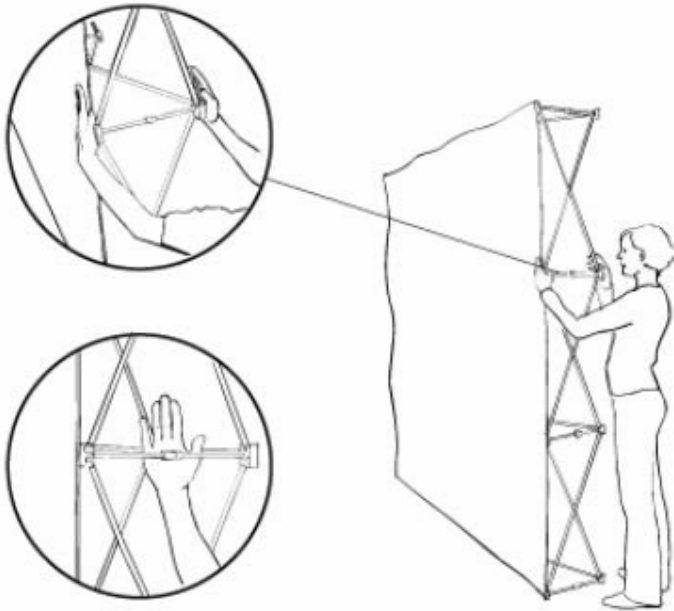

Step 2.

With the assistance of at least one additional person, each take hold of one corner of the frame facing diagonal from each other and gently pull at the corners. This will result in the frame opening from the fold, and continue to pull at the corners until the frame has opened to maximum size.

****Note:** Diagram shows popup being setup vertically. Although this is also feasible, it is recommended to lay the popup flat on the ground first in order to complete Step 3 with ease.

Step 3.

When the frame is fully open, lock it in place by use of the hooks on each side of the frame. Push down on the top edge of the frame and link the two hooks together.

The fabric pop-up is now ready for display. With some assistance set the frame upright by gripping the back grids of the frame and tilt up from the base.

Closing and storing Instructions

When closing the pop-up frame for storage after use, lay the pop-up on the ground and unlock all the hooks on the edge of the frame. Repeat all setup steps in reverse and allow the fabric print to rest on top of the closed frame to allow for efficient storage.

****Note:** Remember to unhook ALL the links; the pop-up will not close if the links are not unlocked.
